

Reviewkiln LLC

Transcription, accessible documents, data entry, websites, editing

I'm Marshall Cusick, an Army veteran (2005 to 2011). From 2021 to 2025 I owned and ran Wildland Medics LLC, a wildfire response company that put medical units on federal and state fire incidents in six states. Reviewkiln is my new company, formed in October 2026. It has no contracts yet, so here is exactly what I offer and what I have done before.

What you get

Transcription. Interviews, hearings, meetings and recorded calls, verbatim or clean read, with timestamps and speaker labels. You get a firm delivery date with the quote. Files are proofread against the audio before delivery.

Accessible PDFs and documents (Section 508). Tagging, reading order, alt text, table headers, form fields and bookmarks. Each file is checked against WCAG 2.1 AA and PDF/UA and comes back with its checker report, so your 508 coordinator can see it pass.

Data entry and conversion. Paper or scanned records into spreadsheets or databases, cleanup and indexing. Spot-checked against the source.

Small websites. Accessible sites for small offices and programs, built and maintained, with a fixed price up front.

Editing and writing. Proofreading, plain-language rewrites, reports and public notices.

Why buy from me

- You deal with the owner. I answer the phone and sign every delivery.
- I price per audio minute or per page, quoted in writing before work starts.
- I'm used to emergency dispatch: take the order, mobilize fast, keep the paperwork clean, get paid through federal and state systems.

Over \$1.2 million

in federal and state emergency medical contracts.

Owner experience at Wildland Medics LLC (below).
